

About workshop cum training program:

DBT BUILDER, BITS Pilani is going to conduct a Virtual Training Program on “Two Days Cloud Based Hands-on Workshop on Computer Assisted Molecular Design in the area of Epigenetics” The aim of the training is to bring together leading academic scientists, researchers, and research scholars, graduate and post graduate students to exchange and share their experiences along with get training to Computer-Aided Drug Designing Techniques, focusing on gene-based anomalies and epigenetics and epigenetics molecular target exploration. Followings are the details:

Training Mode: Online- first come - first registration basis (Link will be shared for registered candidates only)

Registration Charges: Rs. 500/ including GST

For registration details: <https://forms.gle/uQfXuQjxXeNiAw3g7>

Training Day and Duration: April 24 - 25, 2025

The **prerequisites** for attending the workshop are as follows:

1. **Hardware:** A laptop/desktop and external mouse
2. **Operating Systems:** Windows, Linux, or MacOS X
3. **Web Browser:** Chrome, Firefox, Safari, or Edge
4. **Internet speed:** per participant with ~10 Mbps or higher will work great
5. Power Outlets for participants to charge computers

Please do a speed test using the link: <https://www.speedtest.net/>

Certification: Every Participant will receive a participation Certificate.
